Dortek Door Range for the Retail Sector

With a proven track record of success, manufacturing excellence and technical innovation, Dortek is the leading supplier of high quality robust doors to the retail industry. From facilities in Ireland and the UK Dortek manufactures, supplies & installs its specialist doors worldwide.

Because we understand the importance of strong, hard-wearing doors with a long trouble free life span, our range of tough & impact resistant doors are built to last and do not suffer the day to day wear that can be caused by the movement of trolleys and equipment.

Designed & constructed to industry leading standards, all our doors comply with the latest fire, DDA, hygiene & safety standards.

About Us

Dortek offer a wide range of bespoke door solutions specifically for the retail sector. For over 25 years Dortek's doors have been used extensively throughout the UK and Ireland by all major retail chains. Dedicated to retail Dortek combines experience and a tradition of craftsmanship with the most efficient production techniques to ensure that even the largest, fast-track projects can be handled effectively. Substantial investment into manufacturing technology, product development and customer relationship programmes ensure that all our customers receive the highest possible levels of service and product from manufacture through to installation.

Wen-plast GRP Doors

- Glass reinforced polyester (GRP) is an extremely tough, durable, water-resistant material used in demanding environments.
- Hinged and sliding seamless moulded GRP doors in a range of built-in standard colours. Easy to clean, requiring little maintenance. Full range of factory fitted quality door fittings to client's specification.
- Fire resistance of up to 4 hours tested to BS476 part 22 and latest EU standard EN1634-1 with patented hygienic concealed intumescent strips maintaining the seamless construction.
- Choice of frames in GRP, stainless steel or aluminium for insulated panels or masonry/steel constructions.
- Manual or automatic operation with safe, reliable electric drive units.

R Type/S Type Double Action "Traffic" Doors

- Dortek traffic doors are strong, hard-wearing and long lasting
- The GRP door leaf requires minimum maintenance
- No decoration or re-painting needed due to the built in colour
- Easy to clean and designed to withstand all typical cleaning methods
- Protective bumpers are recommended to guard against aggressive traffic and prevent damage to the door face
- With the Disability Discrimination Act (DDA) now a major factor in pedestrian access areas, an additional vision panel positioned at a low level is available to comply with building regulations
- Suitable for all retail stores, supermarkets, bakeries, distribution & warehousing

Customer Care

A skilled team of professional office staff and engineers dedicated solely to retail guarantees the business runs smoothly from the initial enquiry through to installation. As the doors are manufactured by our own factory in Ireland DorteK ensures quality control from start to finish, maintaining our reputation of high standards. When you need to talk to us direct our head office team are specialists in retail, whether its sales, administration or installation we ensure all our customers benefit from a level of service second to none.

Service

Once your new doors are installed, you can rely on DorteK to ensure they remain in peak operating condition, year after year. DorteK's team of engineers have undergone rigorous training and have many years combined technical expertise. All of our engineers are trained and certified to BS7036 standards. Service vans are stocked with the most popular components in the market and with wide coverage across the UK and Ireland you can trust DorteK to respond quickly & efficiently. Flexible service contract details are available upon request.

Solutions

As well as our best known GRP crash door, DorteK provide many other door solutions including cold storage, loading bays and steel doors, many of which can be automated. We provide a comprehensive project management service covering all phases of the installation process from door specification to successful project completion. Experience gained from outside the retail sector gives us the ability to coordinate projects ranging from 1 to 100+ doors. Adding no subcontract or expensive labour costs, our own in house fitting team can seamlessly integrate with live sites during installation with minimum disruption. DorteK can be your one point of contact for all your door solutions.

Relationships

At DorteK we understand that every communication with the customer is vitally important. Our can do attitude along with knowledge of our customers particular needs helps us to give a personal service and constantly exceed expectations. Over the years DorteK have built significant relationships with some of the major brands that shape the retail market such as Aldi, Co-op, Farmfoods, IKEA, Lidl, Sainsbury, Tesco, and Waitrose. With over 150,000 door sets manufactured and installed worldwide, DorteK are recognised by many as pioneers in the industry.

Product Selector

S Type

- Seamless GRP 7mm leaf with 40mm spine for double action spring hinges
- Easy to clean, maintenance free, smooth, non-porous gelcoat surface with built in colour
- Supplied with aluminium framed vision panels
- 3mm thick ribbed grey rubber or 2mm thick smooth finish, high impact grey PVC bonded to door
- Spring bumpers manufactured from polypropylene (see 'R' door)
- Integral spring hinges manufactured in 'Delrin' nylon, which is extremely tough, will not rust and requires no lubrication
- Available in either 'non stop' or 'hold open' versions
- Additional vision panel positioned at low level is available to comply with DDA regulations

R Type

- High impact moulded GRP panel
- 22mm thick reinforced with anodised aluminium spine and edge sections incorporating neoprene seals
- Easy to clean, maintenance free, smooth, non-porous gelcoat surface with built in colour
- Each blade fitted with acrylic vision panel mounted in an unbreakable frame
- Additional vision panel positioned at low level is available to comply with DDA regulations
- Black polypropylene spring bumpers are recommended for heavy traffic situations to absorb impact and prevent damage to the door face
- Dorteck self closing gravity, double action, 240 degree, swing hinge system

K Type

- Moulded in 4 standard heights and 11 widths
- Seamless GRP construction
- Easy to clean and does not harbour bacteria
- Strong & durable, yet light and easy to operate
- The non porous gel coat surface is aesthetically pleasing and requires no maintenance
- Will not surface peel, warp, swell, rot or rust

F Type

- 40mm thick
- Concealed intumescent strip not subject to mechanical damage
- Manual or automatic
- Tested to EN 1634-1 and BS476 part 22
- Smoke sealing tested to BS476 part 31
- Ranging from 30 to 240 minutes
- Available with triple glazed safety glass vision panel in either firelite or Georgian wired

Chiller/Freezer

- Sliding and hinged insulated doors for temperatures down to -40C
- Finished in white coated food safe or stainless steel
- Meets EC/USDA international hygiene standards
- Robust construction with heavy duty rail system and furniture
- Fire resistance up to 1 hour
- Manual or automatic operation

Fast Acting

- Fast acting roller doors for internal and external applications
- 2mm tough anti static smooth finish door
- Optional vision panel
- Counter balanced spring system
- Vertical guides incorporate seals to prevent draughts, dust, insects and vermin
- Variable drive motors 240v or 415 volt for fast reliable operation

PVC Crash doors

- Available in 7 or 10mm PVC to various colours
- 12mm rubber version also available
- Galvanised or powder coated steel construction
- Clear top half or vision panels
- Dual top and bottom pivots
- Easy to install

Steel doors

- Manufactured from two skins of 1.2mm (18swg) Zintec Steel
- 45mm thick door leaf
- Polyester powder coated to any colour
- Bonded to a structural honeycomb infill
- For use internally or externally
- Option of an integrated security lip formed into the panel (not planted on)
- Fire rated up to 60 minutes

Sectional Overhead

- Manual or electrical operation
- Stand, high or vertical lift
- Available with vision panels
- Integrated pass doors

Loading bays

- Sectional overhead doors
- Dock shelters
- Dock levellers
- Wheel guides
- Dock bumpers

Automations

- Designed for door widths up to 1400mm
- Small dimensions make it particularly easy to design and install
- They fit well in a retrofit situation
- Optically and acoustically unobtrusive
- Construction with vibration dampers makes them low in noise
- Require little energy and service
- In case of power cut the doors can be opened manually
